Glossary

Term	Description
Example	Replace with your glossary entries.

Chương 1

Introduction

1.1 Problem Definition

Replace this section with your problem statement.

1.2 Related Work

Replace this section with your related work.

1.3 Research Objectives

Replace this section with your objectives.

Chương 2

Biological Background and Data Description

Replace this chapter with your chapter 2 content.

Chương 3

Methodology

3.1 Model Training and Prediction

Replace this section with your modeling content.

3.2 Data Processing and Pipeline Construction

3.2.1 Solution Integration

Replace this section with your integration details.

3.2.2 Workflow Construction

Replace this section with your workflow construction details.

3.2.3 Workflow Evolution

Replace this section with your workflow evolution details.

3.2.4 Workflow Execution

Replace this section with your workflow execution details.

Chương 4

Experiments and Results

4.1 Experimental Results

Replace this section with your results.

Conclusion and Future Work

Replace this chapter with your conclusion.
